## SUMMARY

Third-year Computer Science student at VIT Bhopal with hands-on experience in full-stack development and IoT systems. I build across the stack — from React frontends to Python backends — and have shipped projects that combine real hardware with AI. Comfortable picking up new tools quickly and working through problems without a lot of hand-holding.

## PROJECTS

### Indoor Health Hub

[GitHub](#)

*Tech Stack: React, TypeScript, TailwindCSS, FastAPI, SQLite, LangChain, Google Gemini*

- **Real-Time Dashboard:** Built a live monitoring system visualizing critical indoor metrics — Temperature, Humidity, PM2.5, PM10, Noise, and Light levels — with an aggregated health score based on WHO and ASHRAE standards
- **AI Health Guardian:** Integrated a context-aware chatbot powered by Google Gemini with access to 7 days of historical sensor data, supporting predictive queries via linear regression and simulated hardware control
- **Bluetooth Connectivity:** Implemented Web Bluetooth API to stream sensor data directly from an ESP32 hub to the browser in real time, without intermediate servers
- **Full-Stack Development:** Designed a FastAPI backend with JWT-based authentication, async SQLite database, and Dicebear avatar integration for personalized user profiles and multi-device management

### Dhan-Niti: AI-Powered Storytelling Web App

*Tech Stack: React.js, TailwindCSS, Node.js, MongoDB, GPT API*

- Developed an interactive AI storytelling platform using React.js, TailwindCSS, Node.js, and MongoDB
- Integrated GPT-based NLP models for dynamic, context-aware story generation
- Designed an intuitive UI to enhance user engagement and personalization
- Managed backend API and database for seamless content storage and retrieval

## EDUCATION

|             |                                                   |                |
|-------------|---------------------------------------------------|----------------|
| 2023 - 2027 | <b>B.Tech (CSE CORE)</b> at VIT Bhopal University | (CGPA: 8.2/10) |
| 2022        | <b>XII (CBSE)</b> at Presidium School             | (85.8%)        |

## ACHIEVEMENTS

- **Finalist, NASA Space Apps Challenge (2024)** - Demonstrated exceptional problem-solving and innovation in space technology applications
- **Third Place, IEEE NSUT Tech Transducer (2024)** - Recognized for outstanding technical project and presentation skills

## SKILLS

|                     |                                                         |
|---------------------|---------------------------------------------------------|
| <b>Programming</b>  | C++, Python, JavaScript, TypeScript, HTML, CSS          |
| <b>Frameworks</b>   | React.js, Node.js, FastAPI, TailwindCSS                 |
| <b>Databases</b>    | MongoDB, MySQL, SQLite                                  |
| <b>Tools</b>        | Git, GitHub, VS Code                                    |
| <b>Other Skills</b> | Problem Solving, Team Collaboration, Project Management |
