SUMMARY

Third-year Computer Science student at VIT Bhopal with hands-on experience in full-stack development and IoT systems. I build across the stack — from React frontends to Python backends — and have shipped projects that combine real hardware with AI. Comfortable picking up new tools quickly and working through problems independently.

PROJECTS

Indoor Health Hub | *React, TypeScript, TailwindCSS, FastAPI, SQLite, Google Gemini* | [GitHub](#) 2025

- Built a real-time indoor environment dashboard tracking Temperature, Humidity, PM2.5, PM10, Noise and Light levels with a **WHO/ASHRAE-based health score** algorithm
- Integrated an AI chatbot powered by **Google Gemini** with access to 7 days of sensor history, supporting predictive queries via linear regression and simulated hardware control
- Implemented **Web Bluetooth API** to stream live data directly from an ESP32 sensor hub to the browser without intermediate servers
- Designed a FastAPI backend with **JWT authentication**, async SQLite database, and multi-device management for named sensor units

Dhan-Niti: Financial Literacy App | *React Native, Expo, Firebase, Clerk, Rapid API* | [GitHub](#) 2024

- Built a cross-platform mobile app to empower rural women in India with financial literacy through **multilingual modules** covering budgeting, saving, investing, and micro-investments
- Integrated a **multilingual AI chatbot** via Rapid API for personalised financial guidance and budgeting advice in regional languages including Hindi, Tamil, and Telugu
- Implemented **Cloud Firestore** for offline-capable data storage and **Clerk Authentication** for secure onboarding and user identity management
- Shipped features including an expense tracker, mentor connect, curated financial news, and AI-driven storytelling for real-world financial motivation

EDUCATION

VIT Bhopal University 2023 – 2027
B.Tech in Computer Science (CSE Core) CGPA: 8.2 / 10

Presidium School 2022
XII, CBSE 85.8%

ACHIEVEMENTS

Finalist — NASA Space Apps Challenge 2024

- Selected as a finalist for innovative problem-solving in space technology out of thousands of global teams

Third Place — IEEE NSUT Tech Transducer 2024

- Recognised for outstanding technical project and presentation at a national-level IEEE competition

SKILLS

Languages : C++, Python, JavaScript, TypeScript, HTML, CSS

Frameworks : React.js, Node.js, FastAPI, TailwindCSS

Databases : MongoDB, MySQL, SQLite

Tools : Git, GitHub, VS Code
